

## OuteRimCon 2.24.24 Program

Time	Program
10:30a - 11:45a	<b>To the Stars and Beyond</b> Why are human beings driven to travel to the stars and is there a benefit? Arlene Busby (M), Jerry Blackburn, Seth Potter
12p -1:30p	<b>Presentation: The Methuselah Star</b> , Is it really older than the Universe" - what is the Methuselah Star and why it is important to know about it. with Ashish Mahabal
1:45p - 3p	<b>Can StarTrek become a Reality?:</b> Can we still dream of the day that we can reach out and seek out new civilizations or are we just fooling ourselves? Technologically, totally possible given enough time. With our current "primitive tech" we have teleported photons, entangled mechanical oscillators, created laser weaponry and even created a warp bubble. With enough time, much of the technology seen on Star Trek can, and will, come to fruition. Timothy Cassidy-Curtis, Seth Potter
3:15p - 4:30p	<b>Presentation:</b> What is Quantum Physics? - Quantum Physics explained for the average person with Seth Potter, Timothy Cassidy-Curtis
